Don't know what CashKaro is

Don't use Cashback apps

Trust Gap: Why DU Students Drop Off?

- **Liquidity Gap (Anxiety):** 60 day wait feels endless, ₹20 now > ₹200 later
- **'Upto' Trap (Skepticism):** "Upto 10%" feels gimmicky, flat rewards build trust
- **Social Proof (Invisibility):** Invisible cashback -> proof builds trust
- **Effort (Friction):** Too many steps kills first-time users

JAGGI

- ✓ To build a smart shopper habit on a tight ₹8k budget
- ✓ High Frequency: Orders Swiggy/Zomato 4–5x a week (Habit)
- ✓ High Value: Shops Myntra/Ajio before college fests (Peak)

- **The Trust Gap:** 63% awareness gap; doubts Pending status.
- **Values Instant:** Prefer ₹20 now over ₹200 later.
- **First-Time Barrier:** "Lagta hai paisa aata hi nahi".

- **Proof:** Trusts a roommate's "Confirmed" screenshot
- **Gateway Category:** Food is the hook for building trust
- **Target:** 2.6L DU students in the Daily Habit vacuum

Metric	Magicpin (The Habit)	CashKaro (The Leader)
User Trigger	I'm hungry now.	I need a dress for next week.
Validation	Instant (Scanner/Bill)	Delayed (7–30 days Pending)
Trust Level	High (Seen it work)	Medium (Heard it works)

Competitor	Target Vibe	The Gen-Z Flaw
GoPaisa	Value Hunters	High friction; clunky mobile UI
CouponDunia	Discount Seekers	Focuses on Savings, not Earnings
CashKaro	Smart Earners	The Pending Anxiety

**90% retention = platform-wide figure. 10% activation = problem statement benchmark.*

The Belgian Waffle X CashKaro

Campaign: "Real Karo"
(The Proof-of-Concept)
"Don't just save. Earn for real."

Aim and Objectives

- **AIM-** Turn skeptical DU students into verified CashKaro users - in 48 hours
- **Awareness:** make CashKaro visible where DU students already are
- **Quality Signup:** peer referral filters genuine users, not random downloads
- **First Transaction:** Belgian Waffle delivers confirmed cashback in 48hrs

2.6L DU Regular students

~ 35k+ Students

10 micro creators + QR rickshaw stickers + campus ambassadors

"Dekho" Awareness

6%

"Vishwas" Quality Signup

2,267 verified signups (85% of installs)

22%

"Kamao" First Transaction

498 active users (22% activation)

Long term

Myntra/Ajio repeat orders

How we reach them

- 10 DU micro creators - Memorable Content.
- QR stickers on e-rickshaws from Vishwavidyalaya metro
- Canteen tent cards near Belgian Waffle outlets
- Budget: ₹16,000

- Campus ambassadors share CashKaro link personally
- New signup unlocks existing ₹75 app bonus
- Peer trust = higher intent users, not random downloads

- Belgian Waffle: pay ₹100 → ₹75 confirmed in 48hrs
- Food = no return period = fastest cashback loop
- 48hr push: "₹75 aa gaya. Myntra delivery ab free."

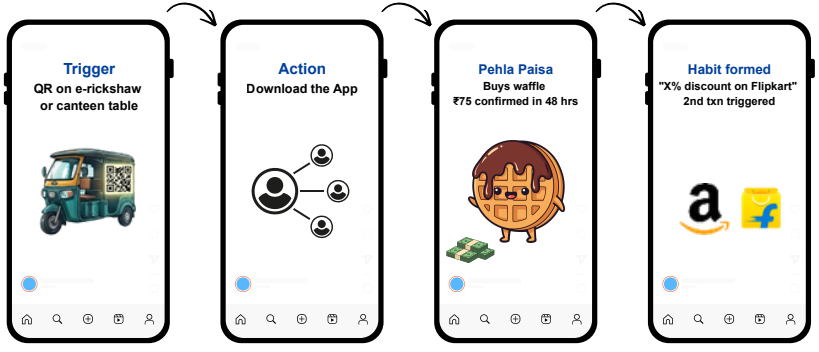

The "Waffle-Trust" Unit Economics

Entity	Pays	Gets
Student	₹100	Waffle + ₹75 cashback = ₹25 net
Belgian Waffle	₹25 commission	₹75 revenue + student footfall
CashKaro	₹50 own budget	Verified transacting user

Execution Strategy: The "Waffle Hook"

- **The Trust Gap**: Standard Fashion cashback takes 30-45 days to Confirm, leading to high student drop-off.
- **The Goal:** Converting 'Skeptical Downloaders' into 'Active Transactors' at a 60% lower CAC than the current benchmark.

CONSUMER JOURNEY

Real karo - Strategic & Unit Economics Overview

Metrics	Cashkaro (Benchmark)	Real Karo (Our Plan)	CHANGE
COST	₹10,000	₹16,000	+₹6K Creators +BTL
CPI	₹6	₹6	Same
INSTALLS	1667	2667	+60%
SIGNUP %	75%	85%	+10%
SINGUPS	1250	2267	+81%
ACTIVATIONS	10%	22%	+120%
ACTIVE USERS	125	498	+298%
CAC	₹80	₹32	60% Better

Activation Improvement backed by = Peer Referal Intent + 48Hrs. Belgian waffle cashback + single onboarding nudge

Active Users	CAC	Activation %
498	₹32	22%
vs 125 Benchmark	vs ₹80 Benchmark	vs 10% Benchmark

REAL KARO CAC BREAKDOWN

User Reward ₹75 → (-25) Merchant Commission (Belgian Waffle)

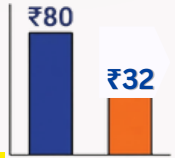

Net Variable Cost ₹50 per activated user

₹0

Blended Calculation

$$\left(\frac{\text{OpEx}}{\text{Users}}\right) \quad \left(\frac{16000}{498}\right) = 32$$

30/60/90 Day Metrics

30 DAYS: Initial Trust

- Achieve 498 Waffle-Activated users
- Measure First Transaction %
- Track Sign-up intent

60 DAYS: Deepening Engagement

- Second transaction %
- Fashion category migration begins

90 DAYS: Reaching Viability

- CAC achieved vs ₹80 benchmark
- Myntra/Ajio repeat orders tracked

THE MARKETING MIX

Rickshaw Hack: QR stickers on 200+ E-Rickshaws (Vishwavidyalaya/GTB).

Proof Reels: 10 SRCC/Hansraj creators show Screen recordings of 48 hours. "No acting, just proof." "Confirmed ₹75"

Risks & Long-Term:

RISK: Critical Dependency

Belgian Waffle BD closure required pre-launch

LONG TERM: Scale & Habit

Swiggy/Zomato cashback partnerships
Build daily habit loop

Appendix

Calculation of Unit Economics

Step 1:- Total installs: Budget ÷ CPI = ₹16,000 ÷ ₹6 = 2,667 installs

Step 2:- Signups: 2,667 × 85% = 2,267 signups Why 85%? Peer referral link means student already trusts the source before downloading. Benchmark is 75% for cold installs.

Step 3:- Activations: 2,267 × 22% = 498 active users Why 22%?
Three compounding reasons:

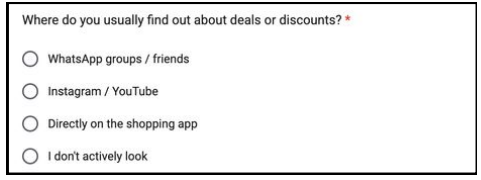

- Peer referral filters genuinely interested users (not random installs)
- Belgian Waffle cashback confirms in 48hrs vs 60 days for fashion - removes the #1 trust barrier identified in our survey (37.8% said "not sure cashback arrives")
- Single clear onboarding nudge removes post-signup confusion (our own app experience confirmed this)

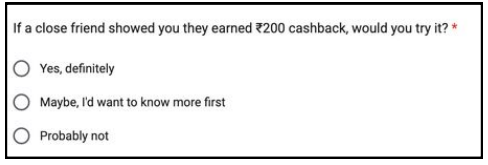

Step 4:- CAC: ₹16,000 ÷ 498 = ₹32 CAC

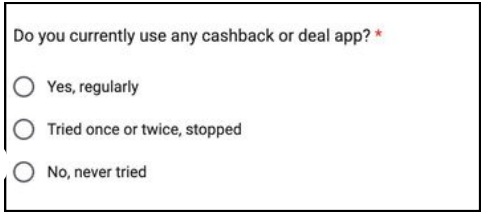

Step 5:- Belgian Waffle financial model (separate from CAC):

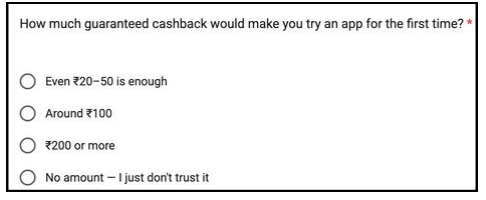

- Student pays ₹100 to Belgian Waffle
- Belgian Waffle pays ₹25 commission to CashKaro (affiliate model)
- CashKaro adds ₹50 from own budget
- Student receives ₹75 cashback = waffle costs ₹25 net
- CashKaro's net spend per waffle transaction = ₹50 (partially offset by ₹25 commission received)
- This ₹50 is the activation cost — separate from the ₹32 CAC which is acquisition cost

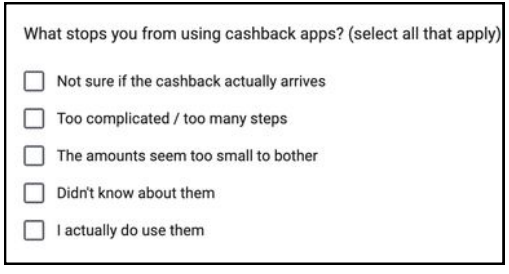

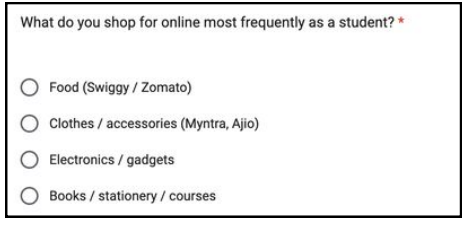

FAQs

Q1: Why Belgian Waffle over Amazon/Myntra for the launch?

The Trust Gap: Fashion/Tech = 30-day returns → 60-day "Pending" status → **Student Churn.**

The Food Edge: Waffles = Zero Returns → **48hr Confirmation** → **Instant Gratification.**

Q2: How does the ₹32 CAC stay sustainable vs. the ₹80 Benchmark?

Fixed campaign cost ₹16,000 ÷ 498 active users = ₹32 CAC. 22% activation vs 10% benchmark means 4x more users from same spend - that's why CAC drops.

Q3: Is the ₹16,000 OpEx enough for 35k+ Reach?

Hyper-Local Logic: Bypassing "Macro" influencers for **10 DU Nano-creators** + **200 Rickshaw QRs.**

The Result: Physical "Surround Sound" at DU Hubs → **High Frequency @ Zero Digital Ad Spend.**

Q4: Why would Belgian Waffle agree to a ₹25 Commission?

Risk-Free Acquisition: They pay **Zero Upfront** → Only pay for *Confirmed Sales.*

Direct Access: Instant footfall from **2.9L DU students** hungry for a "sponsored" treat.

Q5: How do we convert "Waffle Users" into Long-Term Shoppers?

The Habit Trigger: 48hr Push: *"₹75 Confirmed. Your Myntra delivery is now FREE."*

Migration: Moving from **Impulse Food** → **Planned Fashion** → **Daily Survival Utility.**

Q6: What do you mean by Memorable Content Marketing ?
